

LARGE CAPACITY SAMPLE SPLITTER (Universal)

Code : G081

- Designed to halve/divide aggregates, soils, sands, and gravel that are too large in volume into two representative halves.
- The lever-controlled unit is made of heavy-duty steel with a hopper holding up to 28 liters sample.
- The sample is divided into two equal parts using a set of chutes. These chutes release the material in alternating directions into individual collecting pans.
- Each adjustable chute having a thickness of 12.5 mm provides flexibility, allowing to have 12.5 mm to 150 mm opening sizes.

STANDARDS

ASTM C136 • EN 933-3 • AASHTO T27
