

ELECTROMAGNETIC SIEVE SHAKER

Code : G041

- Used to determine the particle size distribution (grading) of fine and coarse materials (aggregates, soil ... etc.) for particles larger than 75 μm
- The results are used to determine compliance of the particle size distribution with applicable specification requirements and to provide necessary data for control of the production of various aggregate products and mixtures containing aggregates. The data may also be useful in developing relationships concerning porosity and packing
- Operated by electromagnetic motor which provides a perfect and standardized sieving to ensure accurate results and eliminate personal errors involved in sieving
- Accepts up to eight full height sieves
- The sieve shaker is available in three sizes:
 - (20 cm) sieves
 - (20 cm) & (30 cm) sieves
 - (20 cm), (30 cm) & (45 cm) sieves

- Equipped with Built-in timer to set the sieving duration
- Equipped with Emergency Stop button
- Supplied with easy-locking knobs
- Noise Reduction Cabinet can be ordered separately
- Sieves, pan and cover are to be ordered separately
